

Lawn care tips

Courtesy of Hayter

Keep your lawn in tip top shape by following this monthly year planner.

JANUARY/FEBRUARY

If weather is mild, occasionally cut the grass, maintaining about 25mm of growth. Keep off the grass if frozen or waterlogged.

MARCH

Rake the grass thoroughly. Spike the lawn all over and apply lawn sand if necessary. Keep mower blades high and just 'top' the grass.

APRIL

Re-seed bare patches, apply fertilisers and mosskiller towards the end of the month. Mow regularly, lowering the blades gradually.

MAY

Treat with selective weedkillers or combined weed/feed preparations if you haven't fed the lawn in April.

JUNE

Mow lawns twice a week if possible working to a definite pattern. Water grass if necessary, remembering to soak thoroughly.

JULY

Treat grass with second application of fertiliser. Water in as necessary. Don't cut the grass too closely.

AUGUST

Keep on mowing regularly and watering as necessary. Fill in any cracks caused by drought with a mixture of sharp sand and soil.

SEPTEMBER

Raise mower blades to allow the grass to thicken and protect roots from winter frost and snow. Apply Autumn-Winter fertiliser, weedkiller and mosskiller.

OCTOBER

Rake out thatch from turf and spike lawn to assist drainage. Brush in soil and sharp sand. Continue cutting as necessary.

NOVEMBER/DECEMBER

Use a stiff broom to remove wormcasts from the grass. Don't mow if very wet as this will compact the soil and encourage waterlogging.

MultiSystem

Stihl

MultiTool

Whatever the task to hand - be it removing moss, aerating the lawn, loosening the soil or sweeping paths and driveways, the Stihl MultiSystem offers the right tool for the job. All MultiTools can be replaced quickly and easily. As a result the system is easily cleaned and immediately ready for many different jobs.

Aerator MM-RL

Uniformly perforates the surface of the lawn so that it can breathe again, thus considerably improving the supply of nutrients and root growth.

De-thatcher MM-MF

Removes moss and matted growth from the surface of the lawn quickly and thoroughly. Complete with guard extension and apron.

Power Sweep MM-KW

Effortlessly cleans level surfaces of dirt, rubble, sand, gravel, wet leaves and snow. Ideal for sweeping pathways, roads and lawns.

Bolo Tines MM-BK

Suitable for spreading sandy soil, for making rows in the soil or for breaking up large sods of earth, for example between freestanding plants.

Depth Blade

Weight Kit

Wheel Kit

STIHL®

Bristle Brush MM-KB

Thoroughly removes dirt, stains or moss from paved areas or uneven stone surfaces. Complete with guard extension.

Pick Tines MM-BF

Even hard or heavy soils are broken up easily and effectively. Ideal for re-cultivation, loosening the soil or around compact planting.
